Subject: ETSR Sample Points

Jim and Larry

Relative to both your questions regarding the historical data summary we sent you:

Based on the old sampling matrices, here is a listing of the lakes, wells, drinking water, etc that were sampled until 1983-84.

Drinking and Well Water

- Camp Smith well
- Camp Field Reservoir
- Croton Reservoir
- Indian Point Well
- Indian Point Tap Water

Lake Vegetation & Surface Water

- Iroquois Lake
- Trap Rock Lake
- Lake Meahagh

Of these, the only ones that remain in the current program are Camp Field Reservoir and Croton Reservoir.

In the old program fish were sampled at 2 locations 'where available near site' which included fish taken from the intake screens. The new program changed that to be one downstream sample location in an area affected by plant discharge and one upstream sample location in an area not affected by plant discharge.
