

U.S.NRC

UNITED STATES NUCLEAR REGULATORY COMMISSION

Protecting People and the Environment

10 CFR Part 26, Subpart I
Managing Fatigue
Proposed Inspection Plan

Timothy Kolb

Operator Licensing and Human Performance Branch
Division of Inspection and Regional Support
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission

NEI Conference
February 19, 2009

NRC Affected Procedures

- 12 potentially affected procedures
 - Reactive inspection procedures
 - Event follow-up procedures
 - Plant status procedure
 - Baseline inspection procedures

NRC Affected Procedures (cont'd)

- 2 new proposed procedures
 - 1 new inspection procedure
 - Detailed inspection guidance to evaluate selected aspects of Subpart I
 - 1 Temporary Instruction (TI)
 - Verify procedures and processes are in place to implement Subpart I requirements
 - Applicable to licensees and other entities subject to Subpart I

Proposed Development Priority

- Revise plant status/outage procedures
 - IMC 2515, Appendix D / IP 71111.20
- Develop new inspection procedure
- Provide reference to new procedure in all other procedures
- Develop TI

Issue Draft Procedures

- Provide new procedure and changes to plant status to Regions for review and comment
- Provide draft TI to Regions for comment

Issue Final Procedures

- Scheduled to be issued by August 31, 2009
- Allows for inspectors/licensees to become familiar with final documents
- Allows time to train inspectors on new inspection guidance

Temporary Instruction

- Primary focus will be to verify procedures and processes in place to implement Subpart I requirements
- Performed within 12 months of implementation date
- Information evaluated to update new and revised procedures
