Washington, DC 20555-0001

Subject: Exelon Nuclear Texas Holdings, LLC
Victoria County Station, Units 1 and 2
Notification of Intent to Submit Additional Environmental Data in
Revision 1 of the Combined License Application
NRC Docket Nos. 52-031 and 52-032

- References:**
1. Exelon Nuclear Texas Holdings, LLC letter to USNRC, "Application for Combined Licenses for Victoria County Station, Units 1 and 2," dated September 2, 2008
 2. Exelon Nuclear Texas Holdings, LLC letter to USNRC, "Submittal of Additional Geological Data and Environmental Monitoring Status Update in Support of Combined License Application," dated October 16, 2008
 3. Exelon Nuclear Texas Holdings, LLC letter to USNRC, "Notification to Designate Alternate Reactor Technology for Victoria County Station, Units 1 and 2 Combined License Application (COLA)," dated November 24, 2008
 4. USNRC letter to Exelon Nuclear Texas Holdings, LLC, "Staff Review of the Combined License Application for Victoria County Station, Units 1 and 2," dated December 18, 2008

In Reference 1, Exelon Nuclear Texas Holdings, LLC (Exelon) submitted an application for a combined license (COL) for Victoria County Station (VCS), Units 1 and 2. Reference 1 also indicated that Exelon would provide supplemental information in support of the review of the VCS Units 1 and 2 COL application (COLA). Specifically, Reference 1 stated that the supplemental information would include:

- (1) the results of an early fall terrestrial survey to be provided by November 14, 2008, and
- (2) the results of aquatic ecology surveys conducted through December 2008 to be provided by February 13, 2009.

In addition, Reference 2 indicated that Exelon would provide monthly the results of groundwater elevation monitoring conducted through January 2009.

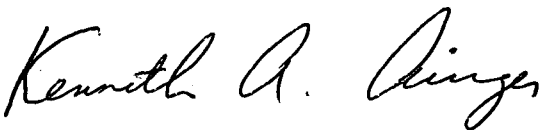

In Reference 3, Exelon notified the NRC that it expects to designate an alternate reactor technology for the VCS project. The NRC responded in Reference 4, indicating that it had suspended the principal portion of its review of the VCS COLA, pending the receipt of a revision referencing and incorporating Exelon's designated reactor technology.

Given the NRC's suspension of the principal portion of its VCS COLA review, Exelon intends to provide the outstanding additional information described in Reference 2 and Reference 3, namely the results of aquatic ecology surveys conducted through December 2008 and groundwater elevation monitoring conducted through January 2009, in Revision 1 of the VCS Environmental Report. The aforementioned aquatic ecology survey results will include those from a winter onsite sampling event, as discussed in Revision 0 of the VCS Environmental Report.

Revision 1 of the VCS Environmental Report will be included with the revision to the VCS COLA that references and incorporates the new reactor technology. The schedule for preparing the revision to the VCS COLA is under development and will be communicated to the NRC when it is finalized.

If you have any questions about this letter, please contact Joseph Bauer at (630) 657-3106 or Joshua Trembley at (610) 765-5345.

Respectfully,

A handwritten signature in black ink, reading "Kenneth A. Ainger". The signature is fluid and cursive, with the first name "Kenneth" being the most prominent part.
