We would like to terminate our NRC materials license. We are requesting that this location (720 Gracern Road Suite 129 Columbia SC 29210), all licensed materials and activities on USGS License 39-25372-01 (NRC Region II) be transferred to the USGS License 05-01399-08 (NRC Region IV). The isotopes and activity limits on the 05-01399-08 license allow all of the materials to be transferred from the 39-25372-01 license without an increase in existing activity limits. Furthermore, our 05-01399-08 license allows USGS operations anywhere in the United States with approval from the USGS Central Region Radiation Safety Committee. This Committee approved the license consolidation on February 12, 2009

This action should occur simultaneous with a letter from Darrell Liles, USGS RSO, sent to the NRC Region IV office to add these licensed materials and activities to license number 05-01399-08 (see attached copy of letter).

Please amend our broad scope byproduct material license 05-01399-08 (Docket 030-03728) as follows:

We request that all licensed material and activities on USGS License 39-25372-01 be transferred to the USGS License 05-01399-08. USGS License 39-25372-01 is held in NRC Region II. Our License 05-01399-08 is currently able to accept all isotopes and activity amounts from the 39-25372-01 license. Furthermore, our 05-01399-08 license allows USGS operations anywhere in the United States with approval from the USGS Central Region Radiation Safety Committee. This Committee approved consolidation of the 39-25372-01 licensed materials and activities in February.

This action should occur simultaneous with a request sent from Francis Chapelle to the NRC Region II office to terminate license number 39-25372-01.
