SUBJECT: SUMMARY OF PUBLIC SCOPING MEETINGS RELATED TO THE
COMBINED LICENSE APPLICATION REVIEW OF THE V.C.
SUMMER NUCLEAR POWER STATION, UNITS 2 AND 3

The U.S. Nuclear Regulatory Commission (NRC) staff conducted two scoping meetings related to the environmental review of the V.C. Summer Nuclear Power Station, Units 2 and 3 (VCSNS), application for combined licenses (COLs) submitted by South Carolina Electric and Gas (SCE&G). The purpose of each meeting was to allow the public an opportunity to participate in the scoping process by providing comments on environmental issues to be considered by NRC in preparing the environmental impact statement for the VCSNS application.

The public meetings were conducted on Tuesday, January 27, 2009, at the Fairfield Central High School in Winnsboro, South Carolina and Wednesday, January 28, 2009, at the McCrorey-Liston Elementary School in Blair, South Carolina. Approximately 130 people attended the January 27th meeting, and approximately 112 were in attendance at the January 28th meeting.

During each meeting, the NRC staff made a formal presentation which outlined the overall licensing process under Title 10 of the Code of Federal Regulations Part 52; provided a description of the NRC's environmental review process; discussed the environmental requirements outlined in 10 CFR Part 51; and addressed how these requirements would be implemented during the VCSNS COLs review. After the presentation, members of the public were invited to ask questions and provide comments. Public comments and questions were mainly focused on socioeconomics, waste disposal, need for power, alternate energy sources, water quality, and water use.
