### **Employment History**

Over 10 years experience in environmental consulting field as a Project Manager with focus on site contamination assessments and remediation, Environmental Site Assessments and NEPA assessments for Federal, State, and local agencies and private sector. Experience in preparing NEPA documents with Nuclear Regulatory Commission (NRC), Federal Transit Administration (FTA), Federal Highway Administration (FHWA), Federal Aviation Administration (FAA), and U.S. Department of Transportation (DOT); state and local experience in Mississippi with MSDOT. Experience in development of Environmental Management Systems (EMS) under ISO Standards. Served as the Environmental Project Manager for SNC in Vogtle License Renewal project and has worked on Vogtle 3 and 4 ESP and COL since January 2006.

- 12/06 – present    Southern Nuclear Operating Company, Environmental Specialist – Served as the Environmental Project Manager for SNC in Vogtle License Renewal project. Provide technical and regulatory support to develop Vogtle 3 and 4 ESP and COL applications and RAIs. Responsible for various environmental permitting and site preparations activities to support Vogtle 3 and 4.
- 5/02 –12/06      Charbonnet & Associates, Planners and Consultants, Inc., Project Manager  
 Headed CAPC's environmental services for the southern region, which included environmental projects for FTA, FHWA, FAA, MSDOT, Jackson-Evers International Airport, and Hawkins Field General Aviation Airport. My duties included conducting Environmental Assessments in accordance with the National Environmental Policy Act (NEPA); Phase I & II Environmental Site Assessments (ESA); Compliance Audits, developing Environmental Management Programs, Public Information Planning, Marketing, and Master Planning activities. I acted as the liaison between my client and the US Army Corps of Engineers on a Formerly Used Defense Site (FUDS) project.
- 5/98 – 5/02      PPM Consultants, Inc., Project Manager  
 Duties include: supervising field operations and technical personnel, client and regulatory agency relations, project logistics, budget control, quality assurance /quality control (QA/QC), proposals, preparing Corrective Action Plans, project status reports, permitting, project completion reports, conduct presentations to client and regulatory agency, and assisted in business development. Also responsible for conducting UST subsurface contamination assessments (Phase I - IV CA), Phase I & II ESA, sampling activities (soil, groundwater and industrial waste), and soil/groundwater remediation activities (remediation activities include: design, install, optimize treatment efficiency, and repairs). My project management role consists of simultaneously managing more than 10 remediation projects as well as dozens of additional MDEQ UST Trust Fund projects.
