Document_Title: GEIS FOR LICENSE RENEWAL OF NUCLEAR PLANTS - INDIAN POINT UNIT NOS. 2 & 3
(NUREG - 1437, Supple/ment 38)

Comments: I live within 10 miles of the Indian Point Nuclear Plants and I oppose their license renewal because:

- 1) They are unsafe for a highly populated area:
the long-term spent fuel storage tanks and dry casks are poorly maintained
and vulnerable to terrorist attack.
- 2) They are killing billions of fish and fish eggs every year including Atlantic Sturgeon and Shortnose Sturgeon, endangered species.
- 3) They continue to leak radioactive water from Indian Point 2 spent fuel pool into the ground and into the Hudson River.
- 4) Residual contamination caused slow leaching of toxic strontium-90 and cesium-137 into the Hudson River via plumes of contaminated groundwater.
