NRC Letter Dated: February 12, 2008

NRC Review of Final Safety Analysis Report

NRC RAI NUMBER: 01-12

Section 302(b) of the Nuclear Waste Policy Act of 1982, as amended, states "The Commission, as it deems necessary or appropriate, may require as a precondition to the issuance or renewal of a license under section 103 or 104 of the Atomic Energy Act of 1954 [42 U.S.C. 2133, 2134] that the applicant for such license shall have entered into an agreement with the Secretary for the disposal of high-level radioactive waste and spent nuclear fuel that may result from the use of such license."

Provide the DOE contract numbers for Bellefonte 3 and 4 for disposal of high-level radioactive waste and spent nuclear fuel or provide TVA's plans, including the time frame, for entering into such a contract.

BLN RAI ID: 3173

BLN RESPONSE:

TVA participated with NEI and other industry participants in negotiating modifications to the existing Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste with DOE to accommodate new reactor construction. TVA is reviewing the final contract that has been entered into between DOE and several entities with existing combined license applications and expects to execute this contract prior to issuance of the final safety evaluation report for Bellefonte Units 3 and 4.

This response is PLANT-SPECIFIC.
