Subject: No Power Lines in the Community of Northdale

Dear Mr. Halpin

As a resident of the Northdale community in Hillsborough County, I would like to express my grave concern over the proposed power lines that Progress Energy is planning in our area. These lines would not serve our community and could greatly disrupt our health, safety and property values. Northdale is robust with families who have children, women who are pregnant, and retired senior citizens who's health would not benefit from this progression. It appears that there is an alternate route that would greatly benefit the citizens of Northdale and I suggest that this alternate route be the one that Progress Energy implements for the benefit of the people.

The Department of State has a duty and obligation to serve the people for the greater good of the greatest number of people. The proposed route by Progress Energy is not for the greater good of the greatest number of people. This route only benefits Progress Energy because it is a less expensive alternative for them, not the people. Can you put a price tag on the health and safety of your citizens?

Also, most of the areas throughout Northdale are Conservation areas. The wildlife and natural beauty of Northdale has already been disrupted enough with long term effects. We do not need to jeopardize these areas any further to fill the corporate pockets.

I would like to officially state my support for the alternative route that follows State Road 54. This route follows a commercial corridor and would not affect as many residential areas. Sometimes people are more important than corporate profits.

Very Respectively,

MSgt Bruce N. Snyder Jr.
