

U.S. NUCLEAR REGULATORY COMMISSION

MATERIALS LICENSE

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Licensee

 In accordance with letter dated
February 10, 2009,

1. The Curators of the University of Missouri

3. License number 24-00513-38 is amended in its entirety to read as follows:

2. University of Missouri - St. Louis
 1 University Boulevard (102 PTB)
 St. Louis, MO 63121-4400

4. Expiration date January 31, 2013

5. Docket No. 030-32694
 Reference No.

6. Byproduct, source, and/or special nuclear material

7. Chemical and/or physical form

8. Maximum amount that licensee may possess at any one time under this license

A. Carbon-14	A. Any	A. 30 millicuries
B. Hydrogen-3	B. Any non-volatile	B. 35 millicuries
C. Iodine-125	C. Any non-volatile	C. 20 millicuries
D. Calcium-45	D. Any	D. 10 millicuries
E. Molybdenum-99	E. Any	E. 10 millicuries
F. Phosphorus-32	F. Any	F. 120 millicuries
G. Phosphorus-33	G. Any	G. 20 millicuries
H. Sulfur-35	H. Any	H. 80 millicuries
I. Zinc-65	I. Any	I. 10 millicuries
J. Nickel-63	J. Any	J. 10 millicuries
K. Iodine-129	K. Sealed source	K. 0.2 microcurie
L. Americium-241	L. Electroplated Needle (Rod)	L. 100 microcuries
M. Cobalt-57	M. Any	M. 10 millicuries

9. Authorized Use:

A. through M. To be used for research and development as defined in 30.4 of 10CFR Part 30, including metabolic labeling, use as tracers for isotope uptake studies by microorganisms (eg., yeast cells), in vitro experiments, instrument calibration, and student demonstrations, as described in the letters dated May 19, 1993, and January 14, 2004 (excluding all references to cobalt-57) and the applications dated August 1, 2002, and January 14, 2004 (excluding all references to cobalt-57.)

MATERIALS LICENSE SUPPLEMENTARY SHEET

License Number

24-00513-38

Docket or Reference Number

030-32694

Amendment No. 24

CONDITIONS

10. A. Licensed material shall be used only at the licensee's facilities located at the University of Missouri - St. Louis, 8001 Natural Bridge Road, St. Louis Missouri.
- B. Licensed material listed in Subitem No. 6.J. may be used at temporary jobsites of the licensee anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for regulating the use of licensed material.

11. The Radiation Safety Officer for this license is Steve Struck.

12. A. Licensed material listed in Item 6 above is only authorized for use by, or under the supervision of, the following individuals for the materials indicated:

Authorized Users

Materials

Teresa Thiel, Ph.D.

Carbon-14, hydrogen-3, phosphorus-32, sulfur-35, phosphorus-33, molybdenum-99.

F. Keith Stine, Ph.D.

Americium-241.

Elizabeth A. Kellogg, Ph.D.

Phosphorus-32 and sulfur-35.

Wendy Olivas, Ph.D.

Phosphorus-32 and sulfur-35.

Patricia Parker, Ph.D.

Phosphorus-32.

Cynthia Dupureur, Ph.D.

Carbon-14, hydrogen-3, phosphorus-32 and sulfur-35.

Marc Spingola, Ph.D.

Phosphorus-32, sulfur-35, Hydrogen-3, carbon-14, and iodine-125.

Colin Mac Diarmid, Ph.D.

Zinc-65, calcium-45, iodine-125, phosphorus-32, phosphorus-33, hydrogen-3, sulfur-35, carbon-14, nickel-63 **and cobalt-57**.

Xuemin (Sam) Wang, Ph.D.

Calcium-45, sulfur-35, phosphorus-32, carbon-14 and hydrogen-3.

Lisa Schechter, Ph.D.

Phosphorus-32 and sulfur-35.

- B. Licensed material listed in Items 6.K - 6.M. shall only be used by, or under the supervision and in the physical presence of, individuals who have successfully completed the manufacturer's training program for gauge users, have been instructed in the licensee's routine and emergency operating procedures and who have been designated by the Radiation Safety Officer.

Docket or Reference Number

030-32694

Amendment No. 24

13. A. Sealed sources and detector cells shall be tested for leakage and/or contamination at intervals not to exceed 6 months or at such other intervals as specified by the certificate of registration, referred to in 10 CFR 32.210.
- B. Notwithstanding Paragraph A of this condition, sealed sources designed to emit alpha particles shall be tested for leakage and/or contamination at intervals not to exceed 3 months.
- C. In the absence of a certificate from a transferor indicating that a test has been made, a sealed source or detector cell received from another person shall not be put into use until tested.
- D. Sealed sources need not be leak tested if:
- (i) they contain only hydrogen 3; or
 - (ii) they contain only radioactive gases; or
 - (iii) the half-life of the isotope is 30 days or less; or
 - (iv) they contain not more than 100 microcuries of beta and/or gamma emitting material or not more than 10 microcuries of alpha emitting materials; or
 - (v) they are not designed to emit alpha particles, are in storage, and are not being used. However, when they are removed from storage for use or transferred to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source or detector cell shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.
- E. The leak test shall be capable of detecting the presence of 0.005 microcurie (185 becquerels) of radioactive material on the test sample. If the test reveals the presence of 0.005 microcurie (185 becquerels) or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission in accordance with 10 CFR 30.5(c)(2), and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations.
- F. The report shall specify the source involved, the test results, and corrective action taken. Records of leak test results shall be kept in units of microcuries and shall be maintained for inspection by the Commission. Records may be disposed of following Commission inspection.
- G. Tests for leakage and/or contamination shall be performed by the licensee or by other persons specifically licensed by the Commission or an Agreement State to perform such services.

Docket or Reference Number

030-32694

Amendment No. 24

14. The licensee shall conduct a physical inventory every 6 months to account for all sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 5 years from the date of each inventory, and shall include the quantities and kinds of byproduct material, manufacturer's name and model numbers, location of the sources and/or devices, and the date of the inventory.
15. A. Detector cells containing titanium tritide foil shall only be used in conjunction with a properly operating temperature control mechanism which prevents foil temperatures from exceeding that specified by the manufacturer and approved by NRC.
- B. When in use, detector cells containing a titanium tritide foil or a scandium tritide foil shall be vented to the outside.
16. Sealed sources or detector cells containing licensed material shall not be opened or sources removed from source holders or detector cells by the licensee.
17. The licensee is authorized to hold radioactive material with a physical half-life of less than or equal to 120 days for decay-in-storage before disposal in ordinary trash provided:
- A. Before disposal as ordinary trash, byproduct material shall be surveyed at the container surface with the appropriate survey meter set on its most sensitive scale and with no interposed shielding to determine that its radioactivity cannot be distinguished from background. All radiation labels shall be removed or obliterated.
- B. A record of each disposal permitted under this License Condition shall be retained for three years. The record must include the date of disposal, the date on which the byproduct material was placed in storage, the radionuclides disposed, the survey instrument used, the background dose rate, the dose rate measured at the surface of each waste container, and the name of the individual who performed the disposal.
- C. Radioactive waste being held for decay shall not be stored for a period greater than 4 years.
18. Radioactive waste other than that specified in Condition 17. shall not be stored for a period greater than 2 years.
19. Radioactive waste currently possessed exceeding the storage provisions of Condition Nos. 17.D., and 18. shall be disposed of within one year of the issuance of this license.
20. This license does not authorize commercial distribution of licensed material.
21. The licensee shall not use licensed material in or on human beings except as provided otherwise by specific condition of this license.
22. The licensee shall not use licensed material in field applications where activity is released except as provided otherwise by specific condition of this license.

Amendment No. 24

23. In addition to the possession limits in Item 8, the licensee shall further restrict the possession of licensed material to quantities below the minimum limit specified in 10CFR 30.35(d) for establishing decommissioning financial assurance.
24. The licensee is authorized to transport licensed material only in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."
25. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents including any enclosures, listed below. The Nuclear Regulatory Commission's regulations shall govern unless the statements, representations and procedures in the licensee's application and correspondence are more restrictive than the regulations.
- A. Applications dated February 28, 1992, August 1, 2002 (with attachments) and January 14, 2004 (excluding all references to cobalt-57);
- B. Letters dated July 20, 1992, January 15, 1997, October 15, 1998, February 17, 2000, August 14, 2001, December 5, 2001 (excluding Item No. 3.), January 14, 2004 (excluding all references to cobalt-57), July 8, 2004, March 4, 2005 (limited to the authorized locations of use for Dr. Wang's research and his application to use licensed material), May 9, 2005, June 16, 2005, November 15, 2005, April 27, 2006, and April 4, 2008; and,
- C. Facsimiles dated May 4, 2000, January 15, 2003 (with attachments) and April 14, 2004.
- D. Letter received February 17, 2009, item (D).
