Conversation with Anas Orfali, POC for the licensee.

The licensee is request that Dr. Pan be added to the NRC license. Dr. Pan is ABR certified in Radiation Oncology, however, in 2005, therefore, not recognized by NRC. The licensee maintains that Dr. Pan is an authorized user at the University of Michigan for 35.400 material. Problem is the reviewer is having a hard time trying to figure out the documents provided. The reviewer has a call into UM for clarification. Mark Driscoll, RSO for UM called the reviewer on 2/24/09 and verified that Dr. Pan is an AU for 35.400 at the University of Michigan.

Also, the name of the facility on the application is different from the name on the license. The reviewer discussed that with Anas who stated he would fax the original letter to NRC concerning the change of ownership and Anas will fax the 7/2/2008 document to the NRC. Apparently NRC never received the notification of name

NRC never received the notification of name change. Fax received, there was no change of ownership according to Fax dated 2/24/09. The

State of Michigan was also notified. The licensee maintains that this information was sent to NRC in July, 2008, however, no action was apparently taken.
