Subject: model numbers please

Licensee Name: The Lane Construction Corporation
License No.: 06-06284-02
Docket No.: 030-15231
Control Nos.: 143308 & 143309

Dear Mr. Larry Tonini,

I left you a voice mail message and promised to followup with an email. I was amending your NRC license and writing your new Virginia license, when I realized we have never identified the model number for the gauges you possess. In other words - Item 9 in your license reads:

A. and B. In Troxler Electronic Laboratories, Inc., CPN International, Inc., Humboldt Scientific, Inc., Seaman Nuclear Corporation, or Soiltest portable gauging devices for measuring physical properties of materials.

It should read something like this:

A. and B. In Troxler Electronic Laboratories Model Nos. 3411, 3400 Series, 4640 Series, and CPN International Model MC-1DR-P portable gauging devices for measuring physical properties of materials.

Could you please provide me with the model numbers you possess? A physical inventory with the make and model is also acceptable. You can fax it to 610.337.5269. The only problem - I need it as soon as possible. Virginia is going agreement the end of the month, but we have to process all of the license actions and box them up way before then.

If you have any questions, feel free to reply to this email or call me at: 610.337.5251

Thank you very much.

Kathy Modes
Sr. Health Physicist
