Desc: Slide 11 of 16, page 424 of 429 in the transcript, was presented to ACRS on September 4, 2008. Now I am focusing on the third line from the bottom of slide 11 which is:

Model for nucleate boiling is overly complex and ad hoc

So, I want:

1. The model for nucleate boiling
2. The identification of the consultant who observed that the model is overly complex, etc.
3. The related remarks of that consultant.

Via FOIA/PA 2009-0067⁷ I have received the report of each of the four consultants. However, under Exemption 5, one of your Directors (Sheron) deleted just about everything.
