**SUBJECT: RADIOCAT, LLC, LICENSE AMENDMENT, CONTROL NO. 143503 AND NEW LICENSE, CONTROL NO. 143504**

Dear Dr. Wachsstock:

By letter dated November 25, 2008, we informed you of the impending Agreement between the U.S. Nuclear Regulatory Commission (NRC) and the Commonwealth of Virginia, whereby, the NRC will relinquish regulatory authority for certain licenses of byproduct, source, and special nuclear material. We also explained that prior to the transfer, your NRC license, which authorized licensed activities in Virginia and at one or more permanent locations in a non-Agreement State (e.g. New Jersey, Virginia, West Virginia, etc.) required an amendment to remove the locations of use in Virginia. In addition, we informed you that a separate license authorizing licensed activities in the Commonwealth of Virginia would be issued. This action is necessary since authorization to conduct licensed activities at permanent locations in NRC-regulated states will no longer be valid once the Agreement is signed and Virginia assumes regulatory authority.

Enclosed you will find an amended NRC license and a new license authorizing licensed activities in the Commonwealth of Virginia. Please review the documents carefully and be sure that you understand and fully implement all the conditions incorporated into the licenses. If there are any errors or questions on the NRC license, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers. Errors or questions on the license authorizing licensed activities in the Commonwealth should be directed to Michael Welling at the Virginia Department of Health, Division of Radiological Health, at (804) 864-8151.

R. Wachsstock

2

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Thank you for your cooperation.

Sincerely,

***Original signed by Stephen Hammann***
