Dilip S. Arora, M.D.
Radiation Safety Officer
Great Lakes Heart & Vascular Institute, P.C.
820 Lester Avenue
Suite 211
St. Joseph, MI 49085

Dear Dr. Arora:

Enclosed is Amendment No. 04 to your NRC Material License No. 21-32256-01 in accordance with your request. Please note that the changes made to your license are printed in **bold** font.

Please review the enclosed document carefully and be sure that you understand all conditions. If you have any questions concerning this amendment, please contact me at either (800) 522-3025 or (630) 829-9841. My fax number is are (630) 515-1078.

Please be reminded that 10 CFR 35.12 requires that all licensing correspondence to us be signed by a senior management official. I noted that the letter dated November 18, 2008, received December 10, 2008, was signed by your "Administrator" but the signature is completely illegible and no printed or typed name was provided.

Please note that, in order to best protect you and your license, as well as to comply with 10 CFR 35.12, it would be best to provide the printed or typed name of the senior management signatory and include a legible signature.

In correspondence dated November 18, 2008, you indicated that you wished to release your former location of use at 820 Lester Avenue, St. Joseph, Michigan for unrestricted use. The NRC staff has reviewed your final status surveys. Based on its review, the staff has concluded that all licensable radioactive material has been removed from your former location of use noted above and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Based on these conclusions no further remediation or actions with respect to NRC regulated material is required for this location and it is suitable for unrestricted use.

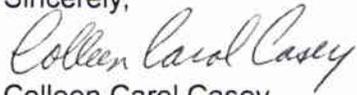

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order

D. Arora

suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

Colleen Carol Casey
Materials Licensing Branch
