Re: SCANA/Santee Cooper Combined License Application

Dear Nuclear Regulatory Commission,

On behalf of Carolinas Associated General Contractors' Association, We are writing to state our support for the two new proposed nuclear reactors in Fairfield County. It is our understanding that the Nuclear Regulatory Commission (NRC) is taking written comments on the scoping process until March 8<sup>th</sup>. We wish to go on record supporting the construction of the nuclear plants and express our belief that the environment will be well protected during the construction and operation of the nuclear plants.

The operators of the existing nuclear plant in Fairfield County, SCANA and Santee Cooper, have a proven record of running the VC Summer Plant in an environmentally sensitive fashion. With no compelling identifiable negative issues concerning the construction and operation of the new nuclear plants, we look forward to a thorough but efficient review of the combined license application by the NRC.

It is no secret that South Carolina must build for the planned growth in demand for electricity. Nuclear power has been a safe, environmentally friendly, efficient, low cost provider in South Carolina for a long time. Moreover, the construction and operation of the plants will generate thousands of construction jobs, a couple hundred direct new permanent jobs and the positive collateral benefits as well.

In closing we want to reiterate our support for the new nuclear plants and ask for favorable consideration by the NRC of the SCANA/Santee Cooper Application.

Sincerely,

Samuel H. Hendrix, Director  
SC Highway Division

Leslie B. Hope, Director  
SC Building Division
