Intake Structure and Blowdown Discharge Structure Construction Schedule

Expected start date 6/20/09

					<u> </u>			_	•	•	40			40		45	4.0	47	10	40	
	Month	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
Activity Description	Duration Months																				
Intake Structure																					
Mobilize Cooling Water Intake Structure labor and equipment	1																				
Clear & Grub and Initial Intake Structure excavation	1																				
Install Temporary Cofferdam	1																				
Install and operate dewating system																					
Complete Intake Structure excavation and earthwork	1																				
Install Intake structure foundation	1																				
Backfill Foundation	1																				
Install Intake structure walls and slab	4																				
Backfill Walls and slab	2																				
Remove Dewatering system																					
Prepare ground and foundation for installing Slab on Grade	1																				
Install Slab on Grade	1																				
Install RipRap	1																				
Reseed Disturbed areas	1																				
Blowdown Discharge Structure																					
Mobilize Blowdown Discharge Structure labor and equipment	1																				
Clear & Grub and Initial Structure excavation	1																				
Install and operate dewating system	6																				
Install Pile Foundation	1																				
Install Structure for supporting pipe	2																				
Install discharge pipes and features	2																				
Backfill pipes and structures	1																				
Remove Dewatering system	1																				
Install RipRap	1																				
Reseed Disturbed areas	1
