Subject: No New Nuclear Reactor at North Anna

Mar 18, 2009

Chief, Rules and Directives Branch, U.S. Nuclear Regulatory Commission Mailstop TWB-05-B01M
Washington, DC 20555-0001

Dear U.S. Nuclear Regulatory Commission,

Please do not allow a third nuclear reactor at the North Anna site in Louisa County, VA, about 30 miles east of Charlottesville.

The North Anna Power Station is not currently in full compliance with the federal Clean Water Act and a third reactor will add to the problems already occurring with warm lake temperatures and downstream flow.

Existing wetlands, streams, and woodlands on the site may be adversely affected by the construction and operation of a new reactor. The semi-permanent storage of radioactive waste at the North Anna site presents health and safety threats to the thousands of people of central Virginia.

A third reactor should not be built at North Anna. It will put unreasonable stress on water resources and jeopardize the health and safety of Virginia citizens. At the very least, since Dominion Power is choosing a new reactor model, a totally new environmental assessment should be conducted.

Indeed we need to explore alternative energy sources; however, we should solve the current problems with the North Anna Power station before expanding it's capacity, as well as it's current problems.

Sincerely,

Ms. Patricia Liske
