Dear Mr. Lawyer:

This letter is in reference to NRC License 09-10672-03 request to amend license. Please remove Ni-63 sealed source material from the license as all of our Ni-63 models are generally licensed with Agilent Technologies. In addition, please remove the Packard 2500 TR Liquid Scintillation Counter with sealed source Ba-133 as this is covered under a general license with Perkin Elmer.

Should any questions arise, please contact Dr. Stephanie Friedman, RSO, at 850-934-2468. Thank you for your attention to this matter.

Sincerely,

Stephanie Friedman, RSO
