Gentlemen:

We have submitted to you an application for byproduct material license, form AEC-313, dated March 19, 1956. The application is for 5 mc of  $C^{14}$  in the form of benzene- $C^{14}$ . In item 10b, the specific activity of material to be used in reaction studies was indicated to be in the order of 1 mc/gram. This was an error and should be corrected to 10  $\mu$ c/gram.

We hope this error has not inconvenienced you or delayed consideration of our application.

Very truly yours,

*Philip C. White*
