Subject: UniStar Nuclear Energy, NRC Docket Number 52-038  
Nine Mile Point 3 Nuclear Power Plant  
FY 2011 Revision Schedule to the Combined License Application  
for Nine Mile Point 3 Nuclear Power Plant

Reference: 1) NRC Regulatory Issue Summary 2009-03 – Process for Scheduling  
Acceptance Reviews of New Reactor Licensing Applications After April 2009  
and Process for Determining Budget Needs for Fiscal Year 2011,  
February 12, 2009

The NRC, in Regulatory Issue Summary 2009-03 (Reference 1), has requested that 10 CFR Part 52 applicants provide a best estimate of the number of planned application submissions, their complexity, and submission date, such that NRC review requirements can be estimated through Fiscal Year (FY) 2011.

In accordance with Reference 1, UniStar Nuclear Energy is providing the following FY 2009 through FY 2011 Combined License Application (COLA) revision schedule for the Nine Mile Point 3 Nuclear Power Plant.

Revision 1 to the NMP3 COLA will be submitted on or before March 31, 2009. This revision corrects the standard language outside of the braces "{ }", (i.e., generic text), to be identical to that in the R-COLA. Additionally, this revision supplements information in FSAR Section 2.5.2.

Revision 2 to the NMP3 COLA has a target submittal in the fourth calendar quarter of 2009 (first quarter of NRC FY 2010). This COLA revision will be a general update incorporating generic text revisions resulting from the NRC-approved R-COLA RAI responses, and Revision 1 to the U.S. EPR Final Safety Analysis Report.

NR0

Any additional application revision submittals for NMP3 in NRC FY 2011 will be declared in accordance with the requested minimum of 90 days before the expected submission date.

There are no regulatory commitments contained in this letter.

If there are any questions regarding this transmittal or need additional information, please contact me at (410)-470-4205 or Michael Yox at (410) 470-6317.

*I declare under penalty of perjury that the foregoing is true and correct.*
