Western Wake Project

To

cc

Subject

Hi David,

in reference to our phone conversation earlier today, I would like to confirm that the letter we received from your office dated February, 15 2006 concurs that the Western Wake Regional Wastewater Management Facilities project is not likely to adversely affect any federally listed threatened or endangered species. This concurrence is based on information provided in the January 2006 Draft EIS and December 2005 Biological Assessment / Biological Evaluation provided to your office by North Carolina Construction Grants and Loan.

Can you please respond to this e-mail indicating the concurrence with the effect determinations in the BA/BE?

If you have any additional questions, please feel free to contact me.

Thank you

Scott Freeman
