To: Raj Annad, NRC, AP1000 Design Certification  
cc: John Segala, Project Manager, AP1000 Design Certification  
Joseph Colaccino, Project Manager, AP1000 Design Certification  
Joelle Starefos, Previously Project Manager, AP1000 Design Cert.

Dear Mr. Raj Annad,

This email is in response to a phone message I received from you yesterday, asking to set up a telecon to discuss the comments I made at ACRS meetings about the AP1000. First, let me say thanks for letting me know that Ms. Joelle Starefos is no longer on the AP1000 project, and for attending to my inquiries in her stead. Second, let me give you some background on the recent email inquiry I sent to her.

As you may know, in the July 18th, 2003 meeting of the ACRS Subcommittee on Future Plant Designs the NRC Staff committed to writing a letter in response to the questions I asked at that meeting. To aid in that effort, and because there had been changes in NRC project management on the AP1000 project, I put together a letter clearly laying out the questions, incorporating all the previous correspondence and describing previous telecons with the NRC staff. I also included a list of all the references referred to in my questions. In addition, in a separate letter, I asked a question about heat of solar radiation and ultimate heat sink. I sent electronic pdf and hard copies of both of these letters to John Segala, Joseph Colaccino, and Joelle Starefos. The titles and dates of these letters are:

--- AP1000 Fluid Systems Design & QA Procedures dated July 30, 2003  
Sterrett to ACRS Subcommittee on Future Plant Designs

--- Heat of Solar Radiation and AP1000 Ultimate Heat Sink  
dated July 31, 2003  
Sterrett to ACRS Subcommittee on Future Plant Designs

Do you have copies of these letters?

If you do not have copies of these letters, please let me know and I will email you pdf copies of them.

As I have already very carefully laid out these concerns, but so far there is no letter responding to them, can you tell me what the purpose of a telcon at this point would be? Perhaps the letters I wrote will contain the information you need.

Please let me know whether you have the letters I sent in July 2003 listed above. I do still look forward to seeing a letter in reponse to them.

Sincerely,  
Susan G. Sterrett
