Alan,

Based on our review and input provided by RES, we find the Action Plan and schedule proposed by PG&E at better characterizing the potential shoreline fault near Diablo Canyon plant to be reasonably complete and comprehensive in scope and acceptable.

Thanks.

Subject: FW: Seismic Action Plan

I thought USGS was going to provide results of their studies in April 09. Looks like their plan does not complete data collection and studies until 6/09 and fault characterization until 9/09. I will check to see why the discrepancy. Alan

Vince/Alan,

Please find attached the action plan and schedule for continued efforts at better characterizing the potential fault near Diablo Canyon. Feel free to contact me or, for technical discussions, Loyd Cluff (415-973-2791) of our geosciences department.
