RE: Amendment Request

LICENSEE: Midwest Division – RBH, LLC
(d/b/a Research Belton Hospital)
NRC License No. 24-24405-01

Dear Sir or Madam,

We wish to amend NRC License No. 24-24405-01 in the following ways:

1. Remove Treadmill Room 217 as a restricted area from our license. Treadmill Room 217 was decommissioned on February 24, 2009, and the decommissioning report is enclosed. We only used Tc-99m radiopharmaceuticals in Room 217 and we did not store radioactive materials or sealed sources in this room. We moved the treadmill to our secured, second floor Nuclear Medicine Area (Room 209 / 210). Room 209 / 210 is already a restricted area on our license.
2. Add the following naturally occurring and accelerator-produced radioactive material (NARM) to our license.

Authorized Use	Requested NARM	Form	Maximum Amount
10 CFR 35.100	I-123	Any	As needed
10 CFR 35.200	Tl-201, In-111, Ga-67, I-123	Any	As needed
10 CFR 35.65	Co-57	Sealed Sources	Not exceeding 1.11 GBq (30mCi) per source

We have reviewed our Radiation Protection Program and radioactive materials license application and we have no program changes to report to the NRC as a result of adding the requested NARM to our license. We do not use PET isotopes at our facility.

Sincerely,

Administrator
