Subject: Withdrawal of Request to Amend SNM-124 to Clarify Requirements for Reflection and Normal Case Conditions

Dear Sir:

In Reference 2 above, Nuclear Fuel Services, Inc. (NFS) submitted a license amendment request to simplify the license requirements in SNM-124 regarding reflection. A conference call regarding the request was held on February 18, 2009, between NFS and NRC. During the conference call, the NRC requested that NFS provide additional information to support the amendment request. At NFS' request and in an effort to clarify what type of additional information was needed, NRC documented the acceptance criteria for the amendment request in an email sent to NFS on March 5, 2009. In order to revise the submittal to better align with the NRC's acceptance criteria, NFS hereby withdraws the current license amendment request (Reference 2). A new submittal will be made at a later date.

If you or your staff have any questions, require additional information, or wish to discuss this, please contact me, or Mr. Randy Shackelford, Nuclear Criticality Safety Manager, at (423) 743-2504. Please reference our unique document identification number (21G-09-0040) in any correspondence concerning this letter.

Sincerely,

NUCLEAR FUEL SERVICES, INC.

A handwritten signature in black ink that reads "BMM Moore".
