

	Nuclear Regulatory Commission
	Exhibit # - NRC000085-MA-BD01
	Docket # - 05200011
	Identified: 03/25/2009
Admitted: 03/25/2009	Withdrawn:
Rejected:	Stricken:

NRC000085

**CARL J. COSTANTINO**  
**Professor Emeritus**  
**Consulting Engineer**  
Department of Civil Engineering  
The City College of the  
City University of New York

**EDUCATION**

BCE	1956	City College of New York
MSCE	1958	Columbia University, majoring in Soil Mechanics and Foundations with Prof. D.M. Burmister
PhD	1966	Illinois Institute of Technology, majoring in Soil Mechanics and Foundations with Prof. E. Vey

**REGISTRATION**

Registered Professional Engineer, New York State

**EXPERIENCE**

1967 - 1996      Department of Civil Engineering, City College of New York  
Conducted research on stress wave propagation through soil and rock materials primarily associated with the seismic response of structures, with special emphasis on evaluation of critical facilities. Problems centered on the study of large strain and nonlinear effects on wave propagation, soil-structure interaction, and the influence of pore water on dynamic response. Directed the activities of Doctoral and Masters candidates. Co-Director of CUNY Center for Earthquake Engineering.

1975 - Present      Seismic Consultant, Nuclear Regulatory Commission  
Perform seismic studies of nuclear reactor facilities for various divisions of NRC at both the design and review stages; assist NRR with evaluation of advanced reactor facilities and audits of existing plant facilities; develop computer programs to assist NRC Staff in their review of facility designs; perform geotechnical site evaluations and liquefaction assessments; testify as expert witness before various licensing hearings.

1985 - Present      Seismic Consultant, Department of Energy  
Assist various divisions of the DOE in geotechnical and seismic evaluations of critical facilities at both the design and review stage; perform safety evaluations for the underground storage facility (WIPP and Yucca Mountain); perform detailed site and liquefaction evaluations for critical facility sites; assist in the development of DOE safety assessment criteria; evaluate seismic safety of critical facilities at Savannah River Plant, Los Alamos National Laboratory, Rocky Flats, Lawrence Livermore National Laboratory; present results to Defense Nuclear Facilities Safety Board.

1971 - Present      Soils Consultant, New York City Transit Authority  
Provide consulting services to NYCTA Engineers on all geotechnical issues at both the design and construction stages; assist Staff to generate criteria and incorporate modern foundation developments into projects (jet grouting, soil stabilization via sand/wick drains, grout curtains, secant cutoff walls, etc); direct development of project criteria for seismic design; assist in the

development of Standards for Structural Design, Field Designs, and Soil Exploration; direct the planning and conduct of field exploratory programs; conduct laboratory testing of samples from various projects sites; develop and inspect field monitoring programs; perform studies for dewatering programs, settlement analyses, pile foundation designs, loads on buried structures, soil stabilization projects.

## **SOCIETY MEMBERSHIP**

Member, US National Committee on Tunneling Technology, National Research Council

### Technical Societies

- American Society of Civil Engineers
- American Society of Mechanical Engineers
- American Institute of Aeronautics and Astronautics
- Transportation Research Board

### Positions Held:

- Chairman, Applied Mechanics Division, Chicago Section, ASME, 1964 -65
- Member, Education Committee, Soil Mechanics Group, Met Section, ASCE, 1980-81
- Reviewer, Applied Mechanics Reviews, ASME
  - Structures Division Journal, ASCE
  - Pressure Vessel and Piping Division, ASME

### Honor Societies:

- Sigma Xi, Chi Epsilon, Tau Beta Pi

## **SOME RECENT PUBLICATIONS ASSOCIATED WITH SOIL-STRUCTURE INTERACTION:**

"Guidelines for Seismic Evaluation of Nuclear Facilities", with C. A. Miller, T. Cheng, G. Bagchi, 10th World Conference on Earthquake Engineering, Madrid, Spain, July, 1992

"Site Specific Seismic Hazard Calculations at Deep Soil Sites", with C. A. Miller, E. Heymsfield, Fourth DOE Natural Phenomena Hazards Mitigation Conference, Atlanta, Georgia, October, 1993

"Comparison of Shaker Predictions with Measured Data from the Hualien Quarter Scale Model Experiment", with C. A. Miller, J. McLean, H. Graves, Fourth DOE Natural Phenomena Hazards Mitigation Conference, Atlanta, Georgia, October, 1993

"Seismic Safety of Earth Dams: A Probabilistic Approach", with N. Simos, M. Reich, Proceedings, Second Inter. Conf. on Computational Stochastic Mechanics, Athens, Greece, June, 1994

"Reconnaissance Report for the Hyogo-Ken Earthquake", Proceedings, 7th US-Japan Workshop on the Improvement of Structural Design and Construction Practices, Applied Technology Council and the Japanese Structural Consultants Association, Kobe, Japan, January, 1996

"Hualien Experiment: Model Response to Earthquakes; Nonisotropic Site Properties; Forced Vibration Tests", with C. A. Miller, H. L. Graves, 14th International SMIRT Conference, Lyon, France, August, 1997

"Considerations in the Evaluations of Site Characteristics on Seismic Response", with W. Silva, OECD Workshop on Engineering Characterization of Seismic Input, Committee on the Safety of Nuclear Installations, OECD Nuclear Energy Agency, Brookhaven National Laboratory, Upton, NY November 15, 1999
