March 17th, 2009

To whom it may concern:

Please do not allow a third nuclear reactor at the North Anna site in Louisa County, VA, about 30 miles east of Charlottesville.

The North Anna Power Station is currently in full compliance with the federal Clean Water Act and a third reactor will add to the problems already occurring with warm lake temperatures and downstream flow.

Existing wetlands, streams, and woodlands on the site may be adversely affected by the construction and operation of a new reactor. The semi-permanent storage of radioactive waste at the North Anna site presents health and safety threats to thousands of people in central Virginia.

A third reactor should not be built at North Anna. It will put unreasonable stress on water resources and jeopardize the health and safety of Virginia citizens. At the very least, since Dominion Power is choosing a new reactor model, a totally new environmental assessment should be conducted.

Say no to a new reactor at North Anna. Thank you.

Sincerely,  
*Mary Alexander*
