Re: Control #114-754  
Request for Radioactive materials License for medical Use

Dear Mr. Brown,

Thank you so much for your recent communications regarding the above referenced license application. Please consider the following responses to your request for additional information:

1. Personnel shielding for the technologist and others from the pharmaceutical preparation and handling area will be supplied by a body shield complete with back and side shields. This shielding will be provided as shown in Attachment E-2 of the original application. All patient doses will be **contained** within their shipping shields or within required syringe shields except during readings taken in the dose calibrator or as excepted by **10CFR, 60(c)** for individual patient administrations. Quality control sources will remain in their individual shielded containers except during use. Radioactive waste will be contained in individually shielded containers or in the DIS area when exposure levels permit. No other category of radioactive materials will be obtained.

2. The Cardiwipe I wipe testing counter specified for use in package receiving, removable contamination surveys, spill decontamination, and counting of samples, wipes, and swipes will be **replaced** by the Victoreen Deluxe Wipe Test Counter Model 05-578. This counter meets the requirements for determination of 2000 dpm.
