ATTN.: Pamela J. Henderson

Dear Ms. Henderson,

As per our telephone conversation, please find the additional information needed in order to complete PharmaLogic Ltd. material license amendment.

1. PharmaLogic Ltd. confirms that we are requesting an exemption from CFR 20.1904(b) for wastes that are to be incinerated. PharmaLogic Ltd. would assure that the waste containers will be delivered directly from our facility to the incinerator and that the containers would not be opened at any point for any reason prior the incineration.

PharmaLogic Ltd. confirms that for all waste for which do not have a specific exemption, PharmaLogic Ltd. will comply with the requirement in 10 CFR 20.1904(b) for removing or defacing radioactive material labels.

2. In reference to contaminated sealed source wipes **from** our customers, PharmaLogic Ltd. **confirms** that all contaminated sealed source wipes will be packaged accordingly and transferred to the appropriate low level waste disposal site or manufacturer of the source that is leaking.

If you have any **further** question, please do not hesitate to call me at 1-802-862-9944.

Sincerely,

William Chatoff R.Ph.,BCNP
