March 17, 2009

Mr. David W. Pstrak, Branch Chief
Rules, Inspections, and Operations Branch
Division of Spent Fuel Storage and Transportation
Office of Nuclear Material Safety and Safeguards
U.S. Nuclear Regulatory Commission
11555 Rockville Pike
Rockville, MD 20852

Subject: Renewal Request for QA Program Approval No- 71-0900, Rev. 7,
(expiration 03/31/09)

Dear Mr. Pstrak:

Washington Group International received the NRC notification of expiration of our QA Program Approval scheduled for March 31, 2009 on September 27, 2007. Currently, our plant is fabricating two Trupact II units for the Waste Isolation Pilot Plant with a scheduled completion date of June 30, 2009.

This letter serves as a request for renewal of this certificate, Docket No. 71-0900, Rev. 7 so we can complete the current project. With renewal of the current certificate it is understood that when the project is completed, we will send you a termination notice.

Thank you for your prompt attention to this matter. Should you have any questions or need additional information, please contact me at 575-725-0034.

Sincerely,

Debra Spearman
Quality Assurance Manager
