Subject: License Amendment Request – Additional Information

(NOTE: This will be used as the Documents Title in ADAMS)

On March 27, 2009, I called Mr. Golberg, et al., and requested that the licensee provide the activity per source and the maximum possession limits for Items 8A, T, W, and X of the current license. Regarding the license amendment, letter dated, December 22, 2008, I also requested that the licensee provide a specific list of devices and sources that they expect to possess, and resubmit their amendment request. I asked the licensee to include the device types, the device manufacturer names and model numbers, the number of devices, the source manufacturer names and model numbers, and the number of sealed sources that they are requesting. I also asked them to include the activity per source and the maximum possession limits in their request.

The licensee also informed me that they would not be able to supply the above additional information for Items 8A, T, W, and X for some time. Because this additional information is required to complete the requested licensing action, I discussed the option of voiding the application, without prejudice. The licensee agreed that voiding the application at this time would be an acceptable option.

Action Required: Void licensing action
