LISLE, ILLINOIS 60532-4352

MAR 30 2009

J. Leo Turek, P.E.
Radiation Safety Officer
Brucker Engineering, Ltd.
7547 Ravensridge Drive
St. Louis, MO 63119

Dear Mr. Turek:

Enclosed is Amendment No. 04, amending your NRC Material License No. 24-32076-01 in accordance with your request by letter dated January 26, 2009. Please note that the changes made to your license are printed in **bold** font.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

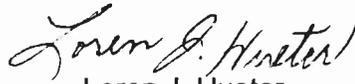

As discussed with you by telephone on 3-26-2009, this amendment adds to your license the new make and model of gauge requested and adds to License Condition 10, the new use/storage location for the gauges, located at 7266 Devonshire Drive, St. Louis, Missouri. Also, as discussed, you will need to apply for a second amendment, after the move has been accomplished, to request the change in your mailing address (after arrangements have been made with the post office) and also to provide additional information needed by us to authorize the deletion from License Condition 10 of the former use/storage location at 7547 Ravensridge Drive, St. Louis, Missouri, based on information demonstrating that it meets NRC criteria for release for unrestricted use.

To support the follow-up amendment request, you will need provide the following information:

1. The make and model no. of each gauge transferred from the old to the new storage facility;
2. The date of the gauge transfer(s);
3. A leak test record (current at the time of transfer) for each gauge transferred confirming the non-leaking status of source(s) in each gauge;
4. A statement confirming that, based on routine leak test data, no leaking sealed sources have ever been possessed at 7547 Ravensridge Drive, ST. Louis, Missouri, if indeed that be fact. (If you have ever possessed any leaking sealed source(s), then a detailed wipe survey of the facility may be necessary to demonstrate that the facility meets NRC criteria for release for unrestricted use.);
5. Confirmation that no licensed material remains at the facility located at 7547 Ravensridge Drive, ST. Louis, Missouri; and
6. Confirmation that the mailing address has been changed to reflect your new address located at 7266 Devonshire Drive, St. Louis, Missouri 63119.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

Loren J. Hueter
Materials Licensing Branch
