SUBJECT: R.E. Ginna Nuclear Power Plant
Docket No. 50-244

**Request for Extension of Submittal of Reactor Vessel
Material Surveillance Capsule Report**

Pursuant to Appendix H of 10 CFR Part 50, R.E. Ginna Nuclear Power Plant, LLC (Ginna LLC) hereby submits for approval a request for an extension to the schedule for submitting the test results from the most recently withdrawn reactor vessel material surveillance capsule at the R.E. Ginna Nuclear Power Plant.

Per section IV.A. of Appendix H; "Each capsule withdrawal and the test results must be the subject of a summary technical report to be submitted, as specified in § 50.4, within one year of the date of capsule withdrawal, unless an extension is granted by the Director, Office of Nuclear Reactor Regulation." Ginna LLC completed its most recent refueling outage in the spring of 2008. The reactor vessel material surveillance capsule "N" was removed during the outage (April 27, 2008) and was subsequently sent off site for testing. In order to provide more time for the vendor to complete the associated technical reports, Ginna LLC is requesting an extension until May 29, 2009 for the submittal of the summary report. Attachment 1 provides the regulatory commitment made in this letter.

Should you have questions regarding this matter, please contact David Wilson (585) 771-5219, or david.f.wilson@constellation.com.

Very truly yours,

A handwritten signature in black ink, appearing to read "Joe Pacher".
