

April 6, 2009

Mr. John Thornton
Corporate Radiation Safety Officer
Professional Service Industries, Inc.
1901 South Meyers Road
Suite 400
Oakbrook Terrace, IL 60181

SUBJECT: NRC INSPECTION REPORT 030-11906/09-01 (FORM 591M Part 1)
PROFESSIONAL SERVICE INDUSTRIES, INC. - RICHMOND VIRGINIA
FACILITY

Dear Mr. Thornton:

This letter refers to the routine inspection conducted on March 11, 2009, at your Richmond, Virginia facility. The inspection results were discussed with you during a final telephonic exit briefing conducted on April 2, 2009.

This inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, independent measurements, and observation of activities in progress. Within the scope of this inspection, no violations of NRC requirements were identified; therefore, no response to this letter or the enclosed NRC Form 591M is required.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

J. Thornton

4. LICENSE NUMBER(S)
12-11906-01

5. DATE(S) OF INSPECTION
March 11, 2009

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, NUREG-1600, to exercise discretion, were satisfied.

Non-Cited Violation(s) was/were discussed involving the following requirement(s) and Corrective Action(s):

- 4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.

Licensee's Statement of Corrective Actions for Item 4, above.

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

Main Office Inspection

Field Office **2801 Ackley Avenue, Richmond, VA 23228**

Temporary Job Site Inspection

Next Inspection Date: _____

PROGRAM SCOPE

This was a routine assist inspection for Region III of the licensee's Richmond, VA facility. The licensee currently possesses 5 gauges - - 4 moisture/density (Troxler Model 3430) and 1 thin-lift (Troxler Model 4640B). Gauges are used several times per month, although work has recently dropped off due to economic conditions. Licensee maintains several trained users, all of whom were trained thru the approved corporate training course. The inspector reviewed and discussed the licensed program with the Site RSO including training, dosimetry, gauge receipt /transfer, leak testing and inventory, instrumentation, utilization logs, key control, transportation and security. The inspector observed proper use of postings, dosimetry, and instrumentation. Audits by the corporate office are performed 1-2 times per year. Results of recent audits showed no significant findings with minor findings corrected quickly and thoroughly. The maximum individual whole body doses for 2006 to date were well within regulatory limits. Security was maintained adequately for storage areas and during transport.

A jobsite was for field observation with a gauge was not available at the time of the inspection.

Overall the program was well-managed. No violations of NRC requirements or other concerns were noted.
