Sylvania-Corning Nuclear Corporation
Cantiague Road
Hicksville, L.I., N.Y.

Attention: Mr. J. M. McTavish
Purchasing Agent

Gentlemen:

This acknowledges your letter dated August 27, as amended by letter of September 12, 1957, in which you inquire as to the applicability of your source material License No. C-3700 to the proposed purchase by you from the Commission of 100 pounds of normal uranium metal in the form of reject plates. You state that this material is not available from commercial suppliers.

License No. C-3700 authorizes you to receive possession of and title to 605 pounds of refined source material through the period of April 1, 1957 to April 1, 1958 at your Hicksville plant and Bayside laboratory for research and development purposes. This outstanding license authority would apply to the acquisition and use by you of the 100 pounds of source material which you now desire to purchase, provided that the quantity limitation contained in the license is not exceeded thereby and provided further that the use to which the material would be put is consistent with the uses heretofore specified.

Contingent upon the effectiveness of your current license authority under the foregoing conditions and in consideration of the stated unavailability of the material from commercial suppliers, this letter constitutes your authorization under source material License No. C-3700 to procure from the Commission prior to April 1, 1958, one hundred pounds of normal uranium metal in the form of reject plates.
