Subject: Re: RE; Request for Permission to Fulfill Filing requirements of 10 CFR 2

Dear Chairman McDade:

FUSE USA would agree in part, and object in part to Susan Shapiro's request as relates to the format and means of fulfilling filing requirements.

1. Producing the document double sided, though saving paper, is problematic from a perspective of marking up the document moving forward...as example, highlighting both sides of a page is problematic, due to bleed through.

We would therefore oppose Certificate of Service criteria that would see the original filing going out in a format that prints the document using both sides of the page.

2. FUSE USA is fine with other documents are on DVD or CD ROM, as long as the documents are not locked in such a fashion that stakeholders cannot mark them up, and edit in notes for use during trial.

On a unrelated issue before the board, FUSE USA is still waiting for confirmation that the board has received, and found acceptable my apology.

Respectfully,

Sherwood Martinelli

Subject: Putting the use of word pricks in perspective.

Dear Board, and other participants. Putting the use of the word pricks in proper perspective, I have taken the liberty here of pasting into this email one singular example of the Pro-Nuclear attacks on members of FUSE USA.

The NRC has been made aware of these attacks, and are not concerned, have stated it is not something in their jurisdiction. Even a stalwart on the Pro-Nuclear side, a man who has had his picture taken in front of nuclear reactors, with Condi Rice and George Bush refers to us as anti-nuclear hillbillies, and the NRC finds it AMUSING...sure if you take the time to actually read some of Norris McDonald's rantings, you'll find things said that are far more inflaming than my own use of the word pricks.

A answer on the adequacy of my apology would be appreciated.

Respectfully,

Sherwood Martinelli

BENNY ZABLE, & THE FAKE "REVOLUTION"

Tuesday, August 7, 2007
Benny Zable Climbs Monteverde

Remy Crapolier and Sherwood Fartsmelly are so isolated from the real people of the Hudson Valley that they misread everything into which they come in contact. There is no intimidation of local people to accept Indian Point. Everybody wants to work there. (yeah, right!) Those who don't work there maintain independent service businesses, caterers, gardeners, carpenters, all the skilled trades, fabrication shops, electrical suppliers- you name it - the list of people doing business with Indian Point is long, long, indeed, and the relationships are cordial. (cordial... like those of fiefdom and Mafioso) Those who neither work or trade with Indian Point, appreciate the steady uplift the plant creates. Electricity, yes. The power is always there, without soot, noise or insult, and the Indian Point staff are family people, raising kids, leading cub scout packs, coaching baseball teams, volunteering as EMT's & firemen. This is America. These are our neighbors, and I myself have lived right here for 6 decades. My father lived right here for 9 decades. That's 15 cumulative decades. (The consequential brain damage is evident)

When will these two oddballs wake up, that it is THEM who have a problem. (If indeed there is any problem at all). Several disinterested observers have noted that both of these guys avoid the standard environmental activist groups, because basically, they are hyping themselves, and joining Riverkeeper would just make them anonymous. (I have been a dues paying member of both Riverkeeper and Scenic Hudson for 20 years). (Proof again that Riverkeeper is a sell out!) They are antinuke wannabes , to the Nth degree, and nothing more. They want Myspace seduction victims to send them \$100 each (they have already asked for it).

Crapolier, born in France, living off his Mom's inheritance, in her house in Weston Connecticut (he's 57...she's still alive) (I'm 54, get your facts right!) has never worked, (never worked... if you mean working at a nuclear power plant, threatening the lives of millions, NO, I've never worked... not according to your definition. Yet anyone who knows me, has spent time with me, has "worked" with me, will tell you a much different story.) as most Americans know the meaning of that word. He has skated for almost 60 years off of Mom's indulgence, sells marijuana over the web (as "Hemp Protein"), (hemp protein powder is NOT marijuana... everybody knows that.) does S&M bondage photography, has no children, and has never been married. Is this the avatar, the spokesman, the leader that "Poor Slumbering Peekskill" wants.... to lead them to "Liberty"? You decide. This fruitball freak belongs nowhere, and not in Peekskill, either.

Fartsmelly has a similar domestic case. He is 52, does not work, never had any children, and is supported by a wife who works at Bronx Community College. Daughter of a noted Italian-American sculptor, she remains a respected person, despite her bad choice in granting Sherwood her family name (He took her name when they married). Observers have noted that if any bad debts or arrest warrants were out there , seeking Sherwood, that he has attained maximum cover via his kindly (but much demeaned) wife.

Whatever fruity bullshit Crapolier writes, he opposes everything that Peekskillers want, and he is out of it. Neither of these birds is important enough to worry about, I just watch them from afar, to keep them honest.... kind of like keeping a

cöckroach farm in a glass jar. I don't even need raid.... in the end, they will eat each other.

Remy, you foreign-born space-cadet liar!

In 2006 you photographed Betcee May across the river, at Thompkin's Cove. You were NEVER near Indian Point (I have the picture right here). (Betcee posed in front of Indian Point... and your point is?) Betcee May now calls you a freak, and hates your guts. Why? (Because of guys like you! Because of Seth Leitman, because of commitments made never fulfilled... Hate is a "big" word... I don't think Betcee is capable of hating anybody... especially me... she just needs to grow up a little, find her own way, fight for what she truly believes in her heart... sort wheat from chaff... she didn't realize how hard this was going to be, was not willing to put in the time and effort... she's growing... she'll come around... and we'll make sure she's safe from guys like you who are out to hurt people if your precious wreck of a nuke is threatened with closure from all the "work" we do!)

"Hundreds of Union Members Standing guard around Peekskill making sure nobody gets out of line"? Are you daft? (I call it a reign of terror... Mafioso tactics, arm twisting, dropping hints, just like you're doing right here... threatening me, my family, with Soprano-like intimidation, to make sure nobody gets into this fight, for fear of having their legs broken in a dark alley... talk to Marilyn Elie, she's afraid to go into your community because of her stance on Indian Point. She's terrified!!!) If an S&M photographer visits my town, YES, I want to know it. Your posters disappeared? Ever think they were offensive to the people whose town you were visiting? (You're tearing down our shut down Indian Point flyers from the Peekskill coffeehouse... you're afraid we might actually appeal to someone's common sense of reason and decency? Everybody that WORKS at the coffeehouse WANTS Indian Point GONE! Why do you think they elected John Hall you lying "sneak in the shadows" spineless creep!) Nobody stands guard, but maybe somebody should, if you intend to come around offering our kids "Hemp Powder Supplements" (Pot). (You are such an uneducated moronic relapse of a human... dooming mankind to a self-fulfilling Christian fanatic apocalypse... I feel deeply, deeply sorry for you... you're a pathetic man.)

Shame on YOU Remy, for never working, for never marrying, for ripping off Native American Pow Wows as antinuke protest venues (I myself have worked dozens of Pow Wows as a musician..... While there, I paid attention to tribal realities..... not my own.) (Yeah, well, if they only knew... thanks for giving us another clue as to your secret identity.)

Alice Slater, the grants distribution executive behind Benny Zable, and his 12,000 mile trip here, has Helaine Heilbrunn Lerner's \$265 million dollar Tamarind Foundation paying fake revolutionaries like you to storm around the east coast and pretend there is an antinuke movement (there is not). (There is, you dope! Saying there isn't one won't make it so...) There is just Alice Slater's fake "Women in Pink", her fake "Benny Zable", and NOW it seems, her fake Remy Crapolier.

Nobody is listening. Nobody cares. (Right! Spano, Cuomo, Hall... + many more... they care, but they're afraid of you, who you represent, your tactics, the fact people could, probably will get hurt.) Be glad the Peekskill people are so magnanimous, that no harm came to your little freak show. Some of the teenagers along Park Street don't like sexually odd strangers hanging out. They might just razz you. (Wasn't Sherwood's arm broken, at the Paramount theater, by Grateful dead fans)? (Another lie... Sherwood had his arm broken during a scuffle with an irresponsible tenant at his home who would not return his key.)

One item of note, though: In a desperate effort to simulate an antinuke movement, Alice Slater was forced this time, to reach half way around the planet and import the Australian anarchist Benny Zable, because nobody local wanted the job.

There IS no antinuke movement, and that's what Sherwood and Remy complain about, ad nauseam. If there was an antinuke movement, they could have settled down long ago into collecting \$5 here, \$20 there, and been on their merry way. But its just the two of 'em. (and maybe a dozen other old communist leftovers like octogenarian Connie Hogarth, or maybe Kevin & Pam Timmons...350 Funk Rd, Schodack Landing NY, ...518-732-1248).

I guess, if Remy's Mom says yes. and Sherwood's wife agrees, ... they can collect from each other., (or Trustco Bank) and finally find happiness.

I think that's what they actually do.

IS PORKIE A CAVEMAN?

Is it possible to be so isolated, so eccentric, and have such a unique view of reality, that the sum effect is tantamount to living as a caveman? Can the scanning of dense indecipherable documents by a caveman bring any useful results? Just because a caveman stays at a Holiday Inn one night (in the dumpster, of course), does that make him suddenly NOT the only Neanderthal in town? Is a "Quest For Fire" a smart thing, when everybody else has electric heating?

Had the engineering world remained stuck in a 1979 time warp, much of what Porgie Tirebiter writes about EPRI research into aging management might seem to an outsider to be true. However, what is NOT contained in any report, is the difference in methodology, a renaissance of ways and means, that has taken place since the current array of nuclear power plants was designed and built.

Prior to the general, routine use of computer calculation to model engineering problems, the community of responsible engineers faced a large problem of calculability. Its a tough word CALCULABILITY. Sliderules, and small hand calculators were the only tools available before the 1983 introduction of the PC, and Lotus123. Large problems, such as designing buildings, were thought to be not calculable, to any precision.

Actually, they could have been precisely modeled, but the time required would have meant either years of repeat calcs, each time changing the input a little, or else whole gymnasiums full of willing engineers, each one doing a slightly different math run. To do business, to get results in a timely fashion, so that a profit could be made, and safe buildings could be built in months, instead of in decades, required a different tactic.

The tactic used, was the limiting case. (By another, less attractive name, it has also been called the "worst case scenario".) The limiting case was used in tandem with the "safety factor" in a specific way, to intentionally overbuild everything, just to be sure. Not knowing exactly where a concrete dome would fail, engineers calculated the strength they thought would be required at its worst case, and then multiplied their result by five (the safety factor), and the dome was built accordingly.

The fleet of 104 American nuclear plants is therefore built much stronger than it needs to be, in fact. It is also much stronger than it needs to be in every detail, because every detail, such as thickness of a pipe, the amount of rebar in a concrete wall, the number of anchors holding a support to the rock, etc., was calculated by the same obsolete intentional overkill.

Intentional overkill was the best tool they had, back then.

But not now.

What Porgie sees as a vast evil conspiracy to allow failure (and cover it up) is not that at all. Porgie assumes everything done by any corporation is evil, and he assumes that everything either done, or not done, by NRC is a failure to live up to something. However, he forgets that the 104 plant owners, and the NRC do not exist to educate Porgie in Engineering realities, but to serve the public.

EPRI research is done to discover, with modern precision, just how strong the plants really are. Yes, it is calculated at each plant, because each plant IS different. Yes, there is no overall program of making results known to the public, because it is ongoing, it is vastly complicated, it is funded by individual plant owners, and thus too huge an information store for Porgie (or any other civilian) to understand. What Porgie sees as an NRC "conspiracy" to "hide" the facts of plant aging from activists, is simply the collection of 104 sets of separate results, and the conscientious use of those results to

individually manage the individual plants. No plant owner wants any failures. Each plant owner wants a viable long-lived asset, to provide his paid service to the communities of customers thirsting for power.

Porgie not only omits any consideration of the 80% of the public who are not offended by the plants (like he is), but he omits any consideration of the 100% of the public who are using their services right now.

Are you willing to pay your electric bill, so you can have modern civilization? Of course you are. This is not some sleazy "conspiracy", it is the civil compact of our very society. Porgie misreads this banal cooperation, as some dark plot to confuse activists, hermits, and those "illuminati" who "realize" that its better to live in a cave, than to allow humankind to utilize the power in the atomic nucleus.

From that eccentric's, hermit's, caveman's point of view, I guess that yes, it may be a plot. Sorry, Porg!

Remy Crapolier, Inveterate Loser ?

BGA is a standard non-nuclear engineering firm with a long, well established relationship with (C E), drawing blueprints, and they only ever worked at (IP) as a (CE) blueprint contractor, doing menial drafting work, and did no (N) work at all. When (En) bought (IP), the synergy between BGA & (CE) meant that BGA more or less ceased doing any work at (IP). (September 2001).

So, to call BGA "nuclear" is not only wrong on facts, its just one more instance of RemyCrapolier straining to make everything fit his latest cracked promotional ideas, and cover up his own personal oddities, unsuitability, and foulups once again.

(BGA is well positioned to bid for the decommissioning contract at Indian Point... If I'm straining anything, it's to generate a process... which evidently you just confirmed here as being a good strategy.)

What normal people in the public domain see, is an unmarried 57 year old eccentric, (54, not that it matters, it just shows you to be a man who cares little for facts!) unable to get along with Betcee May, unable to get along with Summer Raine Oaks, (It's Oakes with an E... and we get along fine... thank you... they're all doing and being exactly who they need to do and be at this point in their lives... letting the old mentor stew while they wrap their head around the grander issue, which is exactly what terrifies you... you can't go around killing everybody anymore... it's the end of that era... no more hits and execution of civil rights leaders, it's well past that... you're left with only slander, and hollow words... impotent tactics... in light of your poor old plant shutting down, mothballed, and a solar future for the Hudson Valley... but unlike all these other kind people who attend the Clearwater festival every year, like the peasants in the Magnificent Seven, guys like Sherwood and I don't play nice, our skin is thicker than yours... and yes, Betcee and Summer are sensitive, attractive women... But they are also very smart, they need time to catch up. They're too young to understand the history, the depth and the sadness of the muck your kind wallows in... we'll smoke you out, we'll find you out, we'll hang you out to dry... your era is over... you're out to pasture... we're electrifying Route 66 and there's NOTHING you can do about it now... except weep!) and most likely unable to get along in a natural way, with any woman at all. (unless she's in Dominatrix drag, and whipping him).

In point of fact, within the "Green Explosion" that's big right now, a mamasboy / Geriatric / Gurdjieff-cult / Sado-masochistic / anti-nuclear / UFO-chasing / Pro-marijuana / French-Born Native American activism is a decidedly fringe phenomenon, obviously bonkers, and liable to be left out of the running no matter who ever hires Betcee May, BGA, or Ms. Oaks.

Oh, and by the way, in 2006, the extra-terrestrial Redman Remy wrote: "The other day I woke up and decided to save the world, by coming out against Indian Point". So what's this "Long Term Antinuclear Stance" you're talking about? It's one year old, pal. When your bogus "Enviro Library" fizzled in 2005, (Bogus? You come one hundred yards from my house with a match, I have a bullet with your name on it, pal! I won't let you, or anyone else like you do to me and my library what you did to Andrija Puharich) and the Tiki nights dried up in 2006, (Right, that's why we're expecting 150+ people at Papaya Thai on December 12th... that's why there's over 1000 people expected at Greendrinks's annual Christmas party this year... wake up fool! You're being greened, and you can't even feel it, you're so crass and retarded!!!!) you sought a new promotion, and (IP) was it. That makes you nothing more than an opportunist manqué. And Stacy Fine now owns your concert idea. Nice going! (Stacy helped Rock The Reactors with a promotion in Woodstock... she doesn't OWN my idea...)

Tell your unemployed friend Steve Fuller I said hi. (Tell him yourself! So he knows you? No wonder he too is chicken! You're just an aging thug.)

For those who need to find out more...check out:

<http://green-nuclear-butterfly.blogspot.com/2007/01/dont-let-chevalier-hustle-movement.html>

(Yeah, publishing photos of me with a Hitler moustache, nice going, very creative... when's the last time you had a creative idea, you cliché riddled robot!)

INDIAN POINT "THEME" USED BY MANIAC TO COLLECT \$1

Sherwood Fartsmelly, Nowhere to Puke.

Sherwood Fartsmelly, schuyster con artist now bilking \$1 out of innocent Myspace minors via bad writing, bad English, and very, very bad intentions, harps on & on about impossible scenarios, because the man has no other thoughts, no other interests, no peer group, no friends, no information about anything, and no reason to post on the web.

If he just wants to service his well-advertised "Open Marriage", he might do better to simply advertise in the personals columns of the Pennysaver (he might already be doing this).... but Sherwood wants to feel "Special", so he goes on and on about crap that everybody else is fed up hearing about, digging himself deeper and deeper into a small, lonely below-ground space with no decorations, no air holes, no entrance, no exit, no phone, no internet connection, nothing but rats, bugs, mold, and darkness.

But the thrill of getting even ONE web reply is so great to this major faux pretender, that he keeps it up, because nobody wants a garden landscaped right now, and he's gotten too lazy and "too committed" (ha ha ha) to ever do any work again. Yeah, he is now fooling himself, too, as well as the 12 year olds who view his predatory Myspace flypaper site. Forget his nincompoop wife, who he scammed into providing him with house, home, a cover-name to evade his past with..... she still thinks he's the "dreamdragon" from 5 years ago. But he's not.

The degradation due to drug & alcohol use has brought on a severe egotistical dementia, and the man is hell bent on becoming a celebrity. In short, he is exhibiting the same autosexual obsessive traits as his new mentor-in-madness.... Remy Crapolier. If Remy existed for 57 years as Momma's boy, with no income, chasing UFO stories, and running Tiki nights at bars, well.... why not old Sherwood the Deadwood?

Here's an idea for ya, Sher. Go over to Division street, and offer to perform every Friday night as an "Activist Poet" for free, at one of the little bistros. You can sit in a small spotlight, and test your ideas with customers face to face, instead of hiding in a deceptive, isolating website, like you have started doing of late. Maybe Pina, or somebody, can do little chalk portraits of the audience members, and gather names & phone numbers for ya. I'm sure you can get somebody with a guitar to fill in during your off sets. Peekskill can then be revived into an antinuke neo-Greenwich Village, with YOU at the center of it. Do it for 6 months, and the Journal News can interview you getting applauded, and Pina doing public art "for the cause". It would cost you nothing to do. Remy can photograph it all, and put it in his LU magazine. Oh, there IS no Lu magazine? Oh, sorry about that.

Here's another one..... walk naked from Division Street, down to the train station, with your body painted flourescent green, and Remy filming the "procession". Call it "Action Art": You will DEFINITELY get in the news if you have the nougats to pull THAT one off. But you won't. No guts. No commitment. It also could be done absolutely for free. But You

just blog, and blog, and blog. Why? to suck in the unsuspecting young people that you wish you were, but are not, and get cash from strangers. It's pitiful, really.

You are NOT an activist.

You are a scheming scam artist, a beggar with a big head, who needs a shave.

And, sorry, pal, but there's no Green Simulated Butt-Fly, either.

Just a disorganized tawdry scam blog, bilking kids for money.

For Shame, Sher..... For Shame!

And oh yeah.... we have to add these tags, (like you do)..to get indexed in Technorati:
Indian Point Nuclear Activism Radiation Death Cancer Doom Gloom Sherwood Martinelli Dolls

without those tags..... who would even notice?

Posted by 22a-rbZD.007 at 2:27 PM

INDIAN POINT DOLLY DELUGE BEGINS !

Thank you, thank you, thank you!

Even WITHOUT a right hand, look at all the great dollies we've played with , and just in the last 2 hours!

WOOPS.... that top one is just my LEFT HAND!
Sorry folks.

Now lets get some great tag action going,
by using the two magic fame-inducing words....

"INDIAN POINT"

Your Dolly Buddys, Porkie'n'Rem
