Date: April 14, 2009 **Project No.**

To: Mr. Loren Hueter

Company: NRC

Telecopier No.: 630-515-1078

From: Josh Gottschall **e-mail:** josh.gottschall@wilcox.us

Regarding: NRC license amendment

No. of Pages: 1 (including cover)

Hardcopy: Yes No

Comments:

Mr. Hueter,

Per our previous conversation I will clarify the following items.

1) Appendix B item 7- Joshua Gottschall is the RSO for this license, item 10- physical inventories are/will be conducted at intervals not to exceed 6 months, to account for all sealed sources and devices received and possessed under this license.

2) Our Standard Operating Procedures will be updated to include:

- a. The statement that "gauges should be blocked and braced to prevent movement during transportation."
- b. The statement that "after making changes affecting the gauge storage area (e.g., changing the location of gauges within the storage area, removing shielding, adding gauges, changing the occupancy of the adjacent areas, moving the storage location to a new location), reevaluate compliance with public dose limits and ensure proper security of gauges."

3) Our Emergency response procedures will be updated to include:

- a. Immediately secure the area around the gauge and keep people at least 15 ft away.
- b. We will add "detain operator" in the heavy equipment statement.

4) We do not possess equipment capable of extending more than 3 feet below the surface.

Let me know if you have any other questions.
