Robert Lowenstein,
Office of the General Counsel

J. C. Delaney,
Chief, Nuclear Materials Branch, L&R

SYLVANIA ELECTRIC PRODUCTS, INC.

L&R:JLL

A form letter dated January 1, 1961, and received in L&R January 18, 1961, from Sylcor, advised us that Sylvania-Corning Nuclear Corporation (Sylcor), on January 1, 1961, became a Division of Sylvania Electric Products, Inc. Sylvania Electric Products, Inc. is not a licensee.

On February 9, 1961, we requested from Sylvania Electric Products, Inc., financial information in order to consider amending their license to reflect the corporate change and also information on any source material license that may be involved. On February 14, 1961, their brief letter of reply said that such information would be forwarded shortly.

Therefore, it appears that until such time as this information is submitted, and appropriate licensing action is taken that Sylvania Electric Products, Inc. may possess source and special nuclear material without an AEC license and are, therefore, subject to compliance action. Your opinion on this matter is requested along with any suggested compliance action that may be appropriate.

A/48
