¹ Standard Method references included in this list are for the 18th Edition. Please refer to 40 CFR Part 136 Table 1B for other Standard Method equivalent editions.

² Some methods may require EPA Region IV approval.

³ For parameters with both an EPA approved method and "Other Method" listed, the most stringent criteria between the two methods must be met. This includes but is not limited to calibration criteria and quality control criteria for matrix and laboratory spikes.

⁴ If an EPA approved method is listed for a compound, this method must be referenced for reporting purposes.
