Subject: Duke Energy Carolinas, LLC
William States Lee III Nuclear Station – Docket Nos. 52-018 and 52-019
AP1000 Combined License Application for the William States Lee III
Nuclear Station Units 1 and 2
Review Guide for Part 3, Environmental Report, Revision 1, and Part 9,
Withheld Information, Revision 2
Ltr# WLG2009.04-02

This letter provides information supporting the Duke Energy submittal of Part 3, Environmental Report, Revision 1 of the application for a combined license for William States Lee III Nuclear Station Units 1 and 2, dated March 30, 2009. Enclosed is a reviewer guide for the changes included in the recent update.

If you have any questions or need any additional information, please contact Peter Hastings, Nuclear Plant Development, Licensing Manager, at (980) 373-7820.

Notes:

1. ER Rev1 Page Number: Identifies the Revision 1 page, range of pages, or figure (identified with the prefix "F") in which each change is incorporated.
2. ER Rev0 Page Number: Identifies the Revision 0 page, range of pages, or figure in which each change originated. The notation "n/a" indicates that the section or table in question was not part of Rev0.
3. ER Letter Number: Refers to the internal numbering used by Duke Energy for identification of the correspondence that provides additional information, including ER mark-ups, as appropriate, and clarifications to information provided in Revision 0 of the William States Lee ER. Table 2 provides the link between the ER letter numbers and the references to Duke Energy correspondence.
4. Change Reference Number: Refers to the NRC sufficiency review comment, NRC information need, request for additional information, erratum, or other change initiator that resulted in each change to the ER. The change references are identified as follows:
 - a. Requests for additional information (RAIs) are identified by the RAI number provided by the NRC.
 - b. All errata are identified simply as "Errata."
 - c. "Supplemental Information" refers to Duke-initiated COLA changes.
 - d. Conforming changes to FSAR RAI are identified as such.
