

Dave Freudenthal,
Governor

Department of Environmental Quality

To protect, conserve and enhance the quality of Wyoming's environment for the benefit of current and future generations.

John Corra,
Director

April 1, 2009

Mr. John Cash
Lost Creek ISR, LLC
Manager EHS and Regulatory Affairs
5880 Enterprise Drive, Suite 200
Casper, WY 82609

RE: TFN 4 6/268, Lost Creek ISR Mine Permit Application

Dear Mr. Cash,

This letter is in response to your letter of February 6, 2009 in which you raised three basic questions concerning LQD's January 30, 2009 technical review of the above-referenced application. Our response follows:

1. RE: Regulatory basis for comments:

Attached is a table that lists the applicable basis for each LQD comment. It should be understood that often there are several different statutes or regulations that have bearing on a given topic. We have attempted to provide the most pertinent citations but our list is not comprehensive and there may be others that do apply.

2. RE: Completeness determination vs. technical comments:

We would like to make the point that often there is no clear distinction between completeness issues and technical issues. This is essentially a judgment call. From the start, Lost Creek ISR made it clear that a completeness determination was a major milestone for the company and one that you wished to acquire as soon as possible. LQD agreed to defer several substantive topics to the technical review in order to expedite your completeness determination.

3. RE: Timeliness of the technical review:

Partial technical comments were sent to Lost Creek ISR in the form of two memoranda under cover letter dated September 26, 2008. At that time Lost Creek was informed of the partial nature of the comments, and that more technical comments were to follow. Based on the completeness date of May 20, 2008, the 150 day deadline would have fallen around October 20, 2008. Lost Creek was advised of the deficiency of the application's technical aspects prior to that date.

Lander Field Office • 510 Meadowview Drive • Lander, WY 82520 • <http://deq.state.wy.us>

Lost Creek ISR personnel are reminded that LQD Lander staff expedited the processing of several Updates to 334DN during 2008 in order to accommodate field investigations at the Lost Creek site. This work took time away from the technical review.

In conclusion, LQD staff conducted a thorough, multi-disciplined, and comprehensive technical review as revealed by the seven reviewers that provided comments on the application. LQD staff are open to discuss in person any questions or concerns Lost Creek ISR staff may have regarding this letter or the technical review of TFN 4 6/268.

Sincerely,

Melissa L. Bautz
Environmental Scientist 2
Lander LQD
