Re: Salsman v. NRC

Dear Mr. Smith:

No amount of context can hide your attempt to disenfranchise me along with all of the other people of our nation, which was foiled by your own selections in your Excerpts of Record. That you tried to lie about whether we are all exposed to uranium was in furtherance of the Commission's neglect of the most serious toxic hazards of uranium just adds to the shame. Radiation has nothing to do with it.

I demand an apology.

Should no apology be forthcoming, I shall take the matter of your intentional misrepresentation of the facts up with the D.C. and Maryland bar associations.

Sincerely,

1.75

James Salsman

> Our brief, when read in context, speaks for itself and does not state that you were never exposed to naturally occurring uranium. Moreover, we note that the NRC does not regulate exposure to background radiation, which includes exposure to naturally occurring radioactive material. See 10 C.F.R. §§ 20.1001(b), 20.1002, 20.1003.
