Comment

I am concern about the dangers that the increase number of power lines will cause to my community. We all know that radiations come from power lines. I feel that our exposure will triple. What health risk or disease can I expect me, children, and grand child to suffer with in 20 years?

I am also concern about the impact on the environment. As I looked at the SCANA Impact Statement there was a number of items listed such as goats, cows, fish, but I did not see the animals that are hunted in this area. Such as deer, rabbit, ducks and turkey. Why are they not listed?

Scoping comments should be postmarked no later than April 6, 2009.

Please fold on the dotted lines with Business Reply side out, tape the bottom, and mail back to the NRC.
