subject
Control No. 317638: Re request by application dated 10-21-08 to renew License No. 13-16347-01.

SUMMARY
In our telephone conversation, the following items were discussed:

1. I noted that Table 5.2 of the application refers to sealed source(s) of Cs-137 but does not address any of the other information needed to be added to the license, including manufacturer and model number of the source and device, activity per source and total activity of the sources, and the planned use to be made of the source(s). If this only applies to a single 8 microcurie sealed source of Cs-137 that would be exempt from licensing per 10 CFR 30.18 (less than 10 microcuries) as was the case when the license was last renewed, please so state. Otherwise please provide the detailed information needed.
2. I noted that NRC policy now requires that a total possession limit be placed on the license for each radionuclide authorized on the license. Please provide this information for Ir-192 and Co-60 and, if appropriate, Cs-137.
3. The Field Station diagrams referred to in Table 9.1 showing: (1) where radiography cameras will be stored and (2) the location where radiography may be performed and its surroundings, including a description of adjacent property, were not received. Please provide.

ACTION REQUIRED
Licensee is to provide response by facsimile to me at 630-515-1078, as additional information to Control No. 317638. No follow-up hard copy is needed. Please call me at 630-829-9829 with any questions and as soon as you have sent response.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this conversation record will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).
