and Environmental Management Programs
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Ref: GSA Response: Tritium Exit Sign Inventory and Management

Dear Ms. McIntosh:

As requested by the Nuclear Regulatory Commission (NRC) on 16 January 2009, the United States General Services Administration (GSA) respectfully submits its inventory of tritium exit signs and specific responses to items A-E presented in the NRC "Demand for Information". Through a data call to our eleven regional offices, we have identified 1,668 tritium exit signs across our building inventory. All efforts were made to obtain accurate information. Thus, to the best of our knowledge this submission reflects the true number tritium exit signs and an accurate picture of how they are managed across GSA. If there are any questions, please contact Patrick Fee at 202-501-0038.

I declare under penalty of perjury that the foregoing is true and correct. Executed on 27 March 2009.

Sincerely,

A handwritten signature in black ink, appearing to read "Lawrence A. Melton".

Lawrence A. Melton
Acting Assistant Commissioner
Office of Facilities Management and
Services Programs
