March 22, 2009

Dear Chief,

Besides all the usual concerns about the proposed #2 nuclear reactor at Callaway County, MO I have another for which our country (USA) has spent millions of dollars on since 9/11. We, the USA, have been totally against Iran in the Middle East obtaining or using nuclear power, not here in MO and the rest of the US,

the US government and others have built or want to build more reactors everywhere to solve our energy problems. Besides being harmful to our land, air and water, every reactor is an opportunity for some assessor against US to seize control and create a situation worse than another 9/11. With this in mind, I hope you and others will reconsider your view of the Mo. #2 nuclear reactor at Callaway County and others across the country and also,

your view against Iran.

Nuclear energy is most likely to solve our ^{future} energy problems but how to deal with its profits could be the problem.

Sincerely,

Mrs. Sandra K. DeLancey

Ce médaillon symbolise l'arrivée de Philippine Duchesne à la Nouvelle-Orléans (Louisiane) où, d'après l'histoire, elle a baisé la terre.

This medallion symbolizes the landing of Philippine Duchesne in New Orleans, Louisiana, where, according to history, she kissed the soil.

Este medallón simboliza la llegada de Philippine Duchesne a Nueva Orleans (Louisiana) donde, según la historia, besó la tierra.
