Sylvania Electric Products, Inc.
Sylcor Division
Cantiague Road
Hicksville, New York

Attention: Mr. D. B. Metz
Manufacturing Manager

Gentlemen:

Under Section 274(b) of the Atomic Energy Act, the Commission is authorized, subject to the conditions prescribed by the Act, to enter into agreements with the Governor of any State providing for the discontinuance by the Commission of its regulatory authority with respect to byproduct materials (radioisotopes), source materials and special nuclear materials in quantities not sufficient to form a critical mass and the assumption of such authority by the agreement State.

The State of New York will assume the regulatory authority described above on October 15, 1962.

As we were unable to process your application for renewal of your License SMB-297 prior to that date, your application will be referred for processing to the New York State Coordinating Council on Atomic Energy, Alfred E. Smith State Office Building, P. O. Box 7036, Albany 1, New York.

Under the New York regulations governing licensing of radioactive material, an AEC license in effect on October 15, 1962 is recognized by the State as a valid license which will expire ninety (90) days after notification of expiration by the State regulatory authority or on the expiration date specified in the AEC license, whichever is earlier.

A/63

OCT 17 1962

To the extent that your pending application requests a renewal of your present license, we hereby deem your application to have been timely filed. Pursuant to the Commission's regulations, Title 10, Code of Federal Regulations, Part 40, Section 40.43(b), this continues your present license in effect on the date of transfer of licensing to the State of New York. As described in the preceding paragraph, we understand that New York will recognize this extension of your license during their continuing review of your application.

Very truly yours,

Donald A. Nussbaumer, Chief
Source & Special Nuclear Materials Branch
Division of Licensing & Regulation
