Re: Demand for information and reporting damaged
Devices containing Radioactive Material.

My name is David Lockwood. I am the Manager of Consolidated Electrical Distributors, Inc. dba Stusser Electric Company at 411 East 54th Ave. Anchorage Alaska 99518. I am the person in charge of our Radio Active Tritium exit signs and their reporting. Our General Materials License number is 50-23255-02, which expires June 30, 2012. I am in receipt of your letter dated January 16, 2009, which requests information and reporting of our Tritium exit signs. We currently have in our possession 24 signs that have an expiration of 10 years and we have 16 signs that have an expiration of 20 years. We are not currently nor have we ever in our history had a sign lost, stolen, or been misplaced or damaged. Our current inventory is one hundred percent accurate. I perform a physical inventory every three months and prepare a report for the NRC. The inventory from the previous three-month reporting period is manually checked and verified against sales documents to insure every sign is accounted for. Any signs that are returned to Stusser Electric for disposal are documented and packaged appropriately for return to Isolute. Every sign that we sell is documented with serial number installation address and contact information. A report on our sales is filed every three months with the NRC. I believe this addresses any concerns raised in you letter. If you have any questions please feel free to contact me at 907 561-1061. I have attached a copy of our license.

Sincerely: David Lockwood
Manager
