Jeffrey Bradley RSO Designate	Bureau of Indian Affairs Great Lakes Agency – Engineering Roads 916 Lakeshore Drive West Ashland, WI, 54806	715-682-2709 FAX -8391

SUBJECT

Control No. 317903 - Re receipt of new license application dated January 27, 2009, for authorization to possess and use Troxler Model 3400 Series and several models of Seaman Nuclear Corporation portable gauges for moisture/density measurements.

SUMMARY

In the telephone conversation with Jeffrey Bradley, the following items were discussed:

1. Mr. Bradley confirmed he was aware of his being named as the proposed RSO for the new license being applied for and of his understanding of his responsibilities and duties as the RSO.
2. I noted that NUREG-1556, Vol. 1, Rev. 1, "Program Specific Guidance About Portable Gauge Licenses", dated November 2001, is the current guidance document we use in evaluating license applications for applicable information and acceptable commitments needed to issue a new license. In the interest of minimizing the efforts of all involved in the license renewal process, it was discussed and agreed that you resubmit the information in Items 7 through 11 of your new license application using the check list format as presented in Appendix B (Suggested Format for Providing Information Requested in Items 5 through 11) of NUREG-1556, Vol. 1, Rev. 1, dated November 2001. Please note that, as indicated on the checklist, no response (not even a check mark) need be submitted with the application for several of the items in Appendix B. Also, please note that the information submitted with application dated January 27, 2009, is sufficient for Appendix A (NRC Form 313) and for Items 5 and 6 of Appendix B and need not be resubmitted, based on your concurrence that The Seaman Nuclear Corporation Model C-75 gauge should in fact be Model C-75BP and your agreement to submit with your response a statement, on your organization's letterhead, signed by a high level management representative, designating you as both the authorized Certifying Officer for the license applicant and as the Radiation Safety Officer for the requested license and authorizing you to represent the licensee in both conversations and signed written correspondence. Alternatively, resubmit NRC form 313 signed by the authorized Certifying Officer.
3. Also, in accord with our current security related criteria, requiring that possession limits to be placed on a license for each radionuclide possessed, please indicate the maximum possession limit you are requesting for Cs-137, Am-241 and Ra-226.
4. If RSO training has already been received, please provide a certificate showing successful completion of the course. If not yet received, confirm that training as described in Item 7 of appendix B of NUREG – 1556, Vol. 1, Rev. 1 will be completed by the proposed RSO before obtaining licensed material.
5. Also please provide some information about your parent organization in Minnesota (name, address, a contact person and telephone number).

ACTION REQUIRED

Licensee has agreed to provide me the requested response to the Items listed above (as **additional information to Control Number 317903 by facsimile at 630-515-1078**). No follow-up hard copy is needed. Any questions may be directed to me by **telephone at 630-829-9829**. **Please call me right after response has been sent** so that I may expedite this license request. Please leave a voice mail message if I am not available to answer the phone.

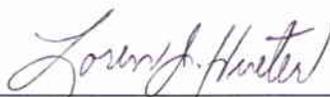

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this conversation record will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).
